

ARRIVAL PLAN AND INFORMATION:

Reaching Sölden, on approx. 1,300 metres above sea level, you have to travel about 10 more kilometres before arriving at Hotel Silbertal: The first little adventures of your holiday.

First you drive through Sölden. Shortly after exiting the village you turn right at the construction site into Gletscherstraße. Follow it for 2.7 kilometres. In the third bend you turn into Infangstraße.

Attention: The junction is directly in the bend, and therefore not so easy to find. You will find the right spot, if you keep in mind, that the gondolas of the lift will circulate right above you. You can also see a little bus stop and signposts on the left side of the street, also showing the way to Hotel Silbertal.

After approx. 200 metres, there is a parking lot. Those of you, who have booked a shuttle, can use one of the parking spots of Hotel Silbertal (the shuttle is only offered during winter season!).

For the rest of you, an approx. 7-km-drive is waiting to reach us on 2,000 metres. Keep to the right at the parking lot and follow the street leading you uphill. Drive along the wooden panels.

We would like to point out that this is a forest road. Like many such roads in Austria, this one is not asphalted, it is a gravel road. The condition can be somewhat difficult, especially after rain.

Therefore, if you arrive by motorbike, we recommend that you leave it at the car park. We will gladly organise a shuttle (for a fee) to the hotel.

Pass the little tunnel. Leaving the forest, you will see the first huts. Now your holiday home is coming closer. 'On the right side, directly in front of you, there is the T-bar lift. The rest of the way is not steep, but you should drive carefully, as the street slopes downward a little. After a short drive you will reach Hotel Silbertal.

The parking places are on the left, directly in front of the house. If you haven't received the information which parking spot is yours, please come to our reception.
